

<p>_____ compression will permanently remove data from a file in order to reduce its file size.</p>	<p>This type of search algorithm will only work if the data is ordered.</p>
<p>What is latency?</p>	<p>This component communicates memory addresses between the CPU and RAM.</p>

\_\_\_\_\_ compression will permanently remove data from a file in order to reduce its file size.

## LOSSY

This type of search algorithm will only work if the data is ordered.

## Binary Search Algorithm

What is latency?

**Latency is the amount of time it takes for data to get from a sender to a receiver**

**Most latency depends on the distance that information is being transmitted**

This component communicates memory addresses between the CPU and RAM.

## Address Bus
