_____ compression will permanently remove data from a file in order to reduce its file size.

LOSSY

This type of search algorithm will only work if the data is ordered.

Binary Search Algorithm

The computational method which is concerned with the removal of unnecessary detail is called...

Abstraction

This defensive measure will 'clean' a inputted data of unwanted characters.

Data Sanitisation

This component communicates memory addresses between the CPU and RAM.

Address Bus

Which type of network covers a large geographic area and will often reply on third party telecommunication companies for its infrastructure.

Wide Area Network
