

Draw a full mesh network for 5 PCs.

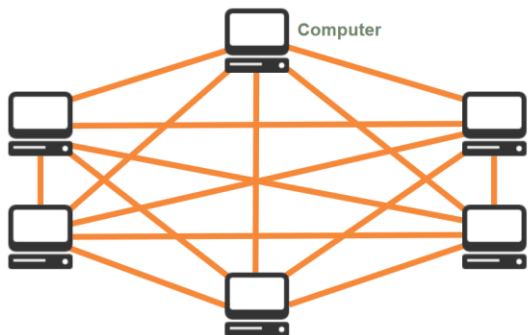

Which type of translator is good for finding errors / debugging and why?

What effect does two shift lefts have on a binary number?

What is the greatest number that can be held in a single digit of Hex?

Draw a full mesh network for 5 PCs.

Which type of translator is good for finding errors / debugging and why?

Interpreter, because it will execute the program's code line by line and will stop translating when it finds an error. Therefore the error can be easily identified

What effect does two shift lefts have on a binary number?

Multiplies by 4.

What is the greatest number that can be held in a single digit of Hex?

15
