

## Question

A programmer has been asked to write a program which will output the last character of any string that the user enters.

Write a program, in pseudocode, which will receive a string from the user and output the last character of the string.

## Answer

## Question

A programmer has been asked to write a program which will output the last character of any string that the user enters.

Write a program, in pseudocode, which will receive a string from the user and output the last character of the string.

## Answer

\*\*\*There are always different ways to solve a problem. This algorithm is just an example. What is important is that the logic is correct!\*\*\*

LOGIC:

- Ask the user to enter a string
- Use a string manipulation method to find the last character of the string
- Output the character

EXAMPLE ALGORITHM:

```
string = input("Enter a word")  
result = string.right(1)  
print(result)
```
