

<p>What is the hexadecimal representation of the decimal number 200</p>	<p>What is the decimal representation of the 8-bit binary number 01111111</p>	<p>What is the difference between a hard disk and a solid-state drive (SSD)</p>
<p>How does a bubble sort algorithm work</p>	<p>What is secondary storage used for</p>	<p>What is a table in a database</p>

<p><i>What is the hexadecimal representation of the decimal number 200</i></p> <p>The hexadecimal representation of the decimal number 200 is C8.</p>	<p><i>What is the decimal representation of the 8-bit binary number 01111111</i></p> <p>The decimal representation of the 8-bit binary number 01111111 is 127.</p>	<p><i>What is the difference between a hard disk and a solid-state drive (SSD)</i></p> <p>Answer: A hard disk uses magnetic storage to store data, while an SSD uses solid-state storage. SSDs are typically faster and more expensive than hard disks.</p>
<p><i>How does a bubble sort algorithm work</i></p> <p>It works by repeatedly comparing adjacent pairs of data in a list and swapping them if they are in the wrong order.</p>	<p><i>What is secondary storage used for</i></p> <p>Answer: Secondary storage is used to write, rewrite and store data when the computer is switched off and retrieve it when switched back on.</p>	<p><i>What is a table in a database</i></p> <p>A collection of data that relates to a person or object.</p>
