

<p>What is the difference between copper cables and fiber optic cables</p>	<p>What are nodes</p>	<p>What are the components of Test Plans</p>
<p>What is the importance of computational thinking in problem-solving</p>	<p>What is the decimal representation of the hexadecimal number D7</p>	<p>What is an advantage of dictionary coding</p>

<p><i>What is the difference between copper cables and fiber optic cables</i></p> <p>Copper cables can suffer from interference, while fiber optic cables do not.</p>	<p><i>What are nodes</i></p> <p>Each device on a network, such as a computer or printer.</p>	<p><i>What are the components of Test Plans</i></p> <p>The test data, the reason for the test, the expected outcome, and the actual result.</p>
<p><i>What is the importance of computational thinking in problem-solving</i></p> <p>Computational thinking is important in problem-solving because it provides a structured approach to solving complex problems, allowing for more efficient and effective solutions.</p>	<p><i>What is the decimal representation of the hexadecimal number D7</i></p> <p>The decimal representation of the hexadecimal number D7 is 215.</p>	<p><i>What is an advantage of dictionary coding</i></p> <p>It allows for exact reconstruction of the file.</p>
