

What are the two main types of cables used for data transfer in Ethernet	What is an example of using the <code>print()</code> function in Python to output text	What is the purpose of formatting software
What is a run-time error	Which is more secure, whitelists or blacklists	What was the main benefit of the Von Neumann Architecture for programming software

<p><i>What are the two main types of cables used for data transfer in Ethernet</i></p> <p>Copper cables and fibre optic cables.</p>	<p><i>What is an example of using the print() function in Python to output text</i></p> <p>print("Hello World")</p>	<p><i>What is the purpose of formatting software</i></p> <p>Formatting software prepares a storage device for data storage by creating sectors and tracks on which data can be stored.</p>
<p><i>What is a run-time error</i></p> <p>An error that occurs in a normal working program if some extreme conditions occur.</p>	<p><i>Which is more secure, whitelists or blacklists</i></p> <p>Whitelists.</p>	<p><i>What was the main benefit of the Von Neumann Architecture for programming software</i></p> <p>It made programming software more accessible to the masses by allowing for the creation of simple coding languages.</p>
